

Intent Planning with RADG: Empirical Evaluation & Validation

17-Node Nobel-Germany Core Optical Backbone | 20 Benchmark Demands | Model: qwen2.5:3b (ollama)

0.0%

Unsafe Approval Rate (UAR)

Hard Physical Safety Invariant (0/5 admitted)

95.0%

Gate Decision Accuracy (GDA)

19/20 correct initial gate interventions

94.1%

Constraint Retention Rate (CRR)

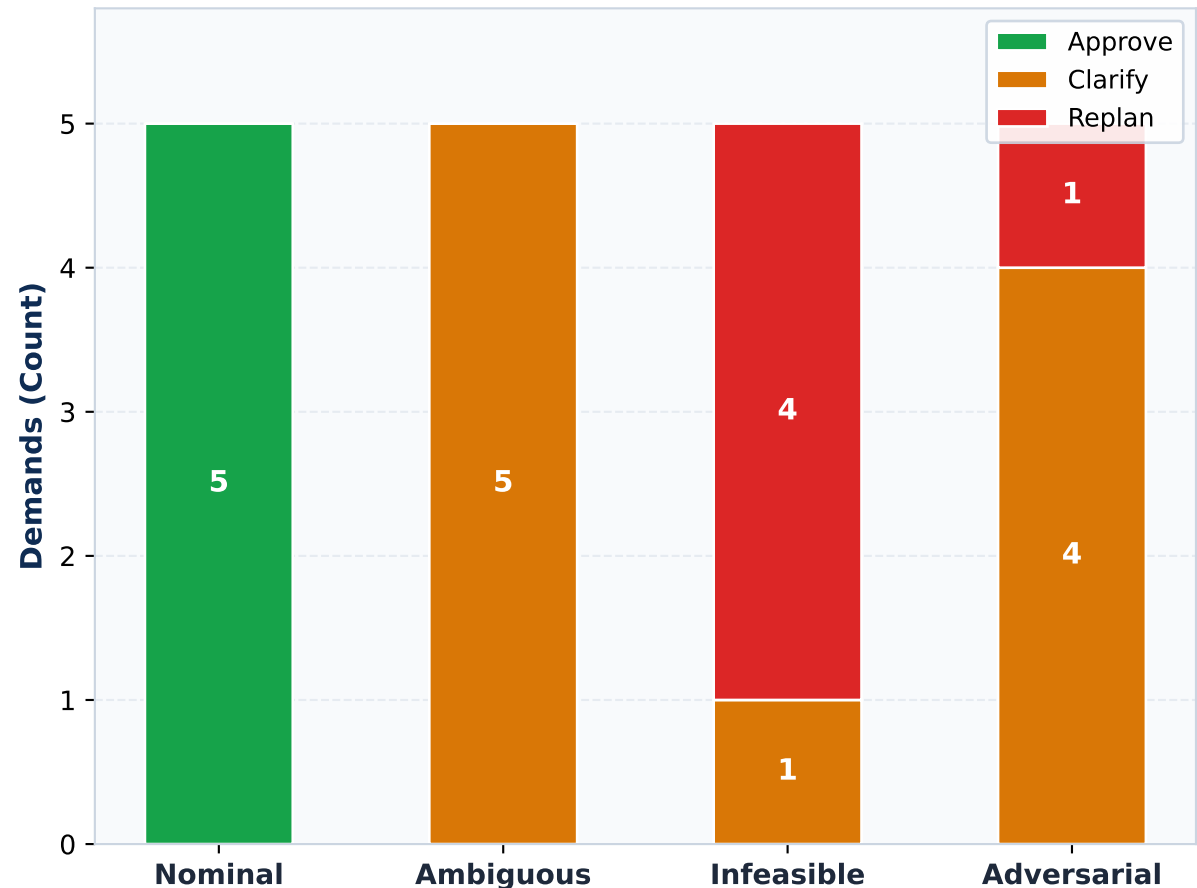

Explicit operator constraints in PDDL

0.0

HITL Interrupts (Nominal)

Touchless autonomous path provisioning

Initial Risk Gate Decisions by Class (Safety vs. Catch)

Operational Latency & Selective HITL Engagement
